

Database SQL Diagram

DevOps plan

Automated Testing Rules (using Jest & GitHub Actions)

General:

UI:

- should render app without crashing
- should conditionally route user based on auth state
- should toggle global theme when theme switch is triggered

API:

- should successfully execute GET request to fetch lists

Store & Store Actions:

- To Do List Reducer
- should return initial state when action is undefined
- should handle adding lists
- should handle getting lists

Login Screen:

UI

- should render username and password input fields
- should dispatch API request when login form is submitted
- should authenticate user when valid credentials are provided

Home (To Do Lists) Screen:

UI:

- should render input field for list creation
- should append list to store and refresh UI when create button is clicked
- should navigate to detail view when a list item is clicked
- should remove list from store and UI when delete button is clicked

To Do List Items:

- should fetch and render items on component mount
- should remove item from UI and state when delete button is clicked
- should persist new order when items are reordered

Animations & UI

Loading Animation:

Have a 4px high orange bar sliding across the bottom of the component that is loading

Login Screen:

white container expands open
Username & password & Submit buttons fade up from opacity:0
When there is a login error, shake the input fields and display a red line under the submit button
Submit fades out the form (reverse of previous) and expands the container to the size of the To Do Lists

Home (To Do Lists) Screen:

fade up list items
on add:
have an orange loading bar cycle on the bottom borders of the add new list button until saving is complete.
animate new item by expanding a new item from height:0 to full height at the top of the list

To Do List Items:

fade up list items
on add:
have an orange loading bar cycle on the bottom borders of the add new list button until saving is complete.
animate new item by expanding a new item from height:0 to full height at the top of the list
